

Harika Balusupati

PENETRATION TESTER

👤 Profile

My expertise lies in online security research, planning, execution, and maintenance. I am skilled in vulnerability assessment and penetration testing. With my experience in vulnerability management, I focus on preventing cyber-attacks, particularly in corporate settings. I am dynamic, efficient, and detail-oriented, with excellent complex problem-solving and communication skills

💼 Employment History

Penetration Tester at Entersoft Information Systems Pvt.Ltd, Hyderabad

October 2021 — Present

- Perform security assessments on the web services (OWASP Rest Security Cheat Sheet) and web application (WASC and OWASP) both manual and automation and exploit for critically risk vulnerable issues and provide tailored remediations. Strong knowledge in SQL Injection, Cross-Site-Scripting, Cross-Site-Request forgery and other various attacks from OWASP/General Categories.
- Hands-on experience on the following sectors Fintech, Healthcare, IT Services, Banking, E-Commerce and more and found many vulnerabilities.
- Conducted assessment on the application from the scratch to the top notch.
- Perform testing using tools like Postman Rest-Client, ReadyAPI, SQL Map, Nmap, Nikto, Directory Search, Burp Suite, etc.
- Preparing formal vulnerability reports that contain information on vulnerabilities (Provide POC's for the existing and non-existing of the vulnerabilities) and tailored recommended solutions to fix them.
- Knowledge and experienced on Open Web Application Security Project (OWASP) and Common Vulnerabilities and Exposure (CVE) process and remediation recommendation to clients on how to mitigate true positive vulnerabilities.
- Worked on various technologies, good at understanding the business of the applications.
- Operating Systems: Windows and Linux.
- Familiar with Chatgpt Tool
